INTERNATIONAL LIVING FUTURE INSTITUTE™ living-future.org/declare

Proudly the first glass company in New Zealand to achieve “Declare Red List Free” status on our double and triple glazing glass.

What is a Declare label?

A **Declare label** is like a "nutrition label" for building products. It provides clear, transparent information about a product's ingredients, where it's made, and its environmental impact. It helps architects and builders choose healthier, more sustainable materials.

Red List Free

The “**Red List**” names the most harmful chemicals found in building products. Red List Free means none of these toxic ingredients are present. By choosing Red List Free, you're creating a healthier home and supporting a more sustainable future.

Metro Glass is proudly Red List Free on our double and triple glazing Low E glass - meaning they contain no toxic chemicals or harmful ingredients.
